🛡 Stay Safe Online
How to Tell if a Website is Real

Rule #1: Don't Click Login Links

If a text, email, or pop-up asks you to log in, stop. Open a new browser window and type the company website yourself.

🔒 Look for a Lock

A lock symbol is a good sign. If you see "Not Secure," do not enter personal information.

👀 Check the Name

Read the website name slowly. Look for misspellings, extra letters, dashes, or added words. amazon.com is different from amazonn.com.

⚠️ When Something Feels Wrong, Stop

If you feel rushed or something seems suspicious, close the page and ask for help.

Common Scam Messages

❌ Your account is locked.

❌ Your package is waiting.

❌ You won a gift card!

❌ Update your password immediately.

Remember: STOP • LOOK • ASK

🛑 STOP before clicking.

👀 LOOK at the website name carefully.

☎️ ASK someone you trust if you are unsure.
