Digital Navigation Survival Guide

Common Icons, Safe Actions, and What To Do When You're Stuck

Technology can feel confusing at times. The good news is that most mistakes can be fixed. This guide explains common symbols and simple ways to recover when things don't go as expected.

🧩 Common Symbols You'll See Everywhere

Symbol	Meaning	What to Do
⚙️	Settings	Change device options
🔍	Search	Look for something
🏠	Home	Return to the main screen
←	Back	Go back one step
✏️	Edit	Change information
➕	Add	Create something new
🗑️	Delete	Remove an item
📤	Share	Send to someone
⬇️	Download	Save to your device
🔔	Notifications	Review alerts
🔒	Security	Protect information
❓	Help	Get instructions

🛟 The Five Digital Safety Nets

When you're unsure what to do, try these steps first.

Safety Net #1: Use Back

If an unexpected screen appears, use the Back button.

Many situations can be fixed by simply going back one step.

Safety Net #2: Return Home

If you're completely lost, return to the Home screen and start again.

Safety Net #3: Stop and Read

Before clicking or tapping, take a moment to read what the screen says.

Safety Net #4: Choose Cancel

If you don't understand a message or button, choose Cancel rather than Continue.

Safety Net #5: Ask Before Sharing Information

Don't enter personal information if something feels suspicious. Ask for help first.

🔧 When Something Goes Wrong

The App Isn't Working and Froze

✅ Close it and reopen it.

I Clicked the Wrong Thing

✅ Try the Back button.

I Deleted Something

✅ Check the Trash or Recycle Bin. Many items can be restored.

I Am Not Sure What Will Happen

✅ Stop and ask someone you trust before continuing.

Three Things to Remember

- ✅ Most mistakes can be undone.
- ✅ You are very unlikely to break a device by tapping the wrong thing.
- ✅ Asking for help is a smart technology skill.
